

The comparative information presented below is based on all companies reporting MCAS **Private Passenger Auto** data to the **state of Ohio** for the year 2008. You can compare your company's results to these statewide average ratios, which were calculated using aggregate data received from all companies for Ohio. For each ratio, there is also a chart indicating the number of reporting companies whose ratios fall into each range of values.

If your company's calculated ratio for any area is 9999.9% it is an indication that activity was reported for that ratio category but a valid ratio could not be calculated. For example, if your company reported non-renewal activity but no policies in force, the ratio of non-renewals to policies in force would show as 9999.9%.
